### Radical Honoursty CommonSism Anarcho-Primitivist:

- [3] **Radical Honoursty Culture:** I am a member of the Radical Honoursty culture, based upon Radical Honesty<sup>8</sup> dispute resolution principles, which is (a) a minority culture, (b) an Ecocentric culture, (c) practices Brutal Honesty Authentic Multiculturalism (Žizek: "The one measure of true love is: you can insult the other"<sup>9</sup>) endorsing authentic diversity of cultures, and (d) does not endorse the homogenizing AnthroCorpocentric Egotist Consumptionism effects of Multinational Globalization of cultures (Multiculturalism: The Cultural Logic of Multinational Capitalism - Žizek<sup>10</sup>). The Radical Honoursty culture is anti 'civilized patriarchy' Primitivist culture.
- [4] **CommonSism Anarcho-Primitivist:**
- [5] I am neither anthropocentrically liberal nor conservative, nor an endorser of AnthroCorpocentric Legislative or Juristic Jurisprudence which only grants Humans and Corporations legal personhood, while denying legal personhood to all other animal and plant species and ecological rights to nature. I identify as a CommonSism Primitivist.
- [6] **CommonSism:** I am the founder of CommonSism<sup>11</sup> -- Common Sense Guerrylla Laws for a Sustainable Commons – which is inspired by among others: the Taker vs. Leaver ideas of the gorilla Ishmael, in Daniel Quinn's books: *Ishmael* and *My Ishmael*; Garrett Hardin's *Tragedy of the Commons*, and the *Order of Melchizedek* ideas of Yakov Rabinovich, as expressed in *Stairway to Nowhere: Chapter 8: Melchizedek — Ecological War*.
- [7] I am also the founder of the concept of Æquilibriæx Jurisprudence, which is Equal & balanced -- Eco/Anthropocentric – law, based upon: æquus (equal), libra/æ (balance), libri (books), and lex (law). Equilibriæx Jurisprudence adheres to the laws of nature / ecology, which manifests as all species living in carry capacity harmony with another. Aquilibriæx Jurisprudence adheres to laws of human nature, which manifests as fully informed consent harmony between all human

<sup>11</sup> <http://sqswans.weebly.com/guerrylla-law.html>

members of society. Æquibriæx Jurisprudence is equal and balanced Anthropocentric and Ecocentric Jurisprudence.

[8] **TYGÆ: Tsedaqah Yshmael Guerrylla Æquibriæx**<sup>12</sup>: TYGÆ's Political Party's platform is based upon Æquibriæx Jurisprudence, Guerrylla Law and CommonSism.

[9] CommonSism's Guerrylla Laws – based upon Aquilibriæx Jurisprudence – regulate human procreation and resource utilization behaviour, by means of legally defining the procreation and consumption difference, and consequent related Sustainable Rights/Penalties, between a Leaver and a Taker, to ensure sustainability.

[10] CommonSism asserts that a majority of society's problems - crime, violence, unemployment, poverty, inflation, food shortages, political instability, vanishing species, garbage and pollution urban sprawl, traffic jams, toxic waste, energy and non-renewable resources (NNR) depletion and scarcity are symptoms of Ecological Overshoot, resulting from the AnthroCorpoCentric Consumptionist Left and Right Wing's war against nature, and the absence of Ecocentric Jurisprudence combined with the failures of AnthroCorpocentric Jurisprudence.

[10.1] Ecological Overshoot is a consequence of all other ideologies and their AnthroCorpocentric adherents failure to legally (a) define the difference between sustainable and unsustainable procreation and consumption behaviour; and (b) provide legal rights to sustainable practices, and legal penalties to unsustainable individuals, corporations and organisations.

[10.2] Guerrylla Laws (A) simply and very specifically clarify the difference between the consumption and procreation behaviour of an Unsustainable Taker (Scarcity Combatant) vs a Sustainable Leaver (Eco-Innocent); and are (B) used in courts to (a) provide legal rights and socio-political rewards of recognition to Sustainable Leaver's for their Heroic lifestyle choices and practices; (b) confront Taker Scarcity Combatants of their Breeding / Consumption combatant behaviours aggravation of Scarcity induced socio-economic problems, by means of aggravated legal penalties, in accordance to their 'Taker Scarcity Combatant' status.

[10.3] Guerrylla Laws define the Eco/Ego Footprint<sup>13</sup> procreation and consumption behaviour of an individual as a Sustainable Leaver (aka Eco-Innocent) or Unsustainable Taker (aka Scarcity-Combatant), based upon a sustainable consumption bio-capacity of 1 global hectare (gha)<sup>14</sup> (60 % of 1.8 gha)<sup>15</sup> in

---

<sup>12</sup> <http://tygae.weebly.com>

<sup>13</sup> EcoFootprint: The difference between the biocapacity and Ecological Footprint of a region or country. A biocapacity deficit occurs when the Footprint of a population exceeds the biocapacity of the area available to that population. If there is a regional or national biocapacity deficit, it means that the region is importing biocapacity through trade or liquidating regional ecological assets. Global biocapacity deficit cannot be compensated through trade, and is overshoot.

<sup>14</sup> Sustainable Footprint Biocapacity: A biocapacity of 1 gha assumes that 40% of land is set aside for other species. 1 gha is 60 % of 1.8 gha, therefore .8 hectares is set aside for other species.

<sup>15</sup> International Biocapacity: In 2006, the average biologically productive area (biocapacity) per person worldwide was approximately 1.8 global hectares (gha) per capita. In 2008, there were ~ 12 billion hectares of biologically productive land and water on Earth. Dividing by the number of people alive in that year (6.7 billion) gives 1.79 global hectares per person. This assumes that no land is set aside for other species that consume the same biological material as

accordance with the proactive conservation policies of Bhutan<sup>16</sup>; multiplied by an individuals Breeding footprint factor of 20 per child. [(Each Child increases a parents footprint by factor of 20<sup>17</sup>)]

- A. **Sustainable Leaver / Eco-Innocent:** 0 children, consumption < 20 gha (Intn'l Biocapacity (1 gha) x 20); or 1 child, consumption < 1 gha.
- B. **Unsustainable Taker / Scarcity-Combatant:** 0 children, consumption > 20 gha; or 1 child, consumption > 1 gha.
- C. For example: My Consumption Footprint<sup>18</sup> using Sustainable Economy's Myfootprint.org quiz, is 12.75 global hectares (gha). South Africa's average consumption footprint is 38.59 gha. I have no children, consequently my procreation factor is 0 x 20\* = 0. My Consumption (12.75) x Procreation (0) = Eco Footprint of 12.75/0 gha. If accurate, if everyone consumed and procreated like me, we would need 0.81 earths.<sup>19</sup> Conversely, if everyone consumed and procreated like President Jacob Zuma, we would need 2090 earths<sup>20</sup>.

[10.4] **TYGÆ's Purpose:** (A) Tsedaqah: ecological, political, gender, cultural and religious balance; (B) Yshmael creation of a Leaver society, by means of practice and legislation of CommonSism's Guerrylla Laws which regulate human procreation and resource utilization behaviour, by means of legally defining the procreation and consumption difference, and consequent related Sustainable Rights/Penalties, between a Leaver and a Taker, to ensure sustainability; (C) Guerryllæ warriors engage in Guerrylla Law practice and socio-political support for Leaver Ecological, Animal Rights, Indigenous Rights, Separatist Multiculturalism, Decentralization, Relocalization, De-Industrialization, Primitivization, Radical Honesty and Transparency Activism; against Taker Individuals and Corporations, working for a low/no tech relocalized and decentralized Agrarian or Primitivist separatist ethno/cultural homogenous tribal society; (D) Æquilibriæx Jurisprudence: recognizes all animal, plant and human species rights to legal personhood, and the importance of all decisions and actions being evaluated in

---

humans. If for example, there were only 3.5 billion people alive that year, that would have provided everyone with 3.5 gha. If there were only 1 billion people, their would be 12gha biocapacity for each persons needs.

<sup>16</sup> Bhutan Proactive Conservation: Bhutan is seen as a model for proactive conservation initiatives. The Kingdom has received international acclaim for its commitment to the maintenance of its biodiversity. This is reflected in the decision to maintain at least sixty percent of the land area under forest cover, to designate more than 40% of its territory as national parks, reserves and other protected areas, and most recently to identify a further nine percent of land area as biodiversity corridors linking the protected areas. Environmental conservation has been placed at the core of the nation's development strategy, the middle path. It is not treated as a sector but rather as a set of concerns that must be mainstreamed in Bhutan's overall approach to development planning and to be buttressed by the force of law. - "Parks of Bhutan". Bhutan Trust Fund for Environmental Conservation online. Bhutan Trust Fund.

<sup>17</sup> Paul Murtaugh (7-31-09): Family Planning: A Major Environmental Emphasis, Oregon University  
<http://sqswans.weebly.com/child--ecofootprint-x-20.html>

<sup>18</sup> [http://myfootprint.org/en/your\\_results/?id=2559685](http://myfootprint.org/en/your_results/?id=2559685)

<sup>19</sup> <http://sqworms.weebly.com/lara-johnstone-eco-081.html>

<sup>20</sup> President Zuma's consumption footprint using Sustainable Economy's Myfootprint.org quiz, is 65.66 global hectares (gha). President Zuma's Procreation Factor is 500 [President Zuma has 25 children. His procreation footprint factor is 25 x 20\* = 500. (Each Child increases a parents footprint by factor of 20)]. President Zuma's Net Consumption & Procreation Footprint is 33280 gha [Consumption (65.66) x Procreation (500) = Net Footprint of 33280 gha]. If accurate, if everyone consumed and procreated like President Zuma, we would need 2,090 earths.

<http://sqworms.weebly.com/jacob-zuma-ego-2090.html>

terms of their contribution to *Æquilibriæx* balance; (E) Sustainable Security: There is no security without Sustainability. Sustainability is impossible without a return to a Leaver society.

[11] **Anti ‘Civilized Patriarchy’ Anarcho-Primitivist:**

[12] **‘Civilized’ Patriarchy (pa•tri•arch•y):**

[12.1] A system of society or government, is Patriarchal to the extent that it regulates (a) the relations between humans, nature and other animals species and (b) the relations between humans amongst themselves, in terms of their gender, culture, ethnic, religious and ideological conflicts; for the (c) almost exclusive benefit of violent Anthropocentric humans and corporations.

[12.2] Consequently a legal, political or social system is Patriarchal to the extent of its (a) failure to provide automatic equal legal personhood and rights to nature and animal and plant species; (b) disregard for the objective and scientific carrying capacity truth of the laws of nature/ecology; and (c) disregard for the laws of human nature; when they contradict the AnthroCorpocentric – breeding and consumption war – objectives of the holders of subjective AnthroCorpocentric Truth.

[12.3] A society has violent Patriarchal breeding and consumption war objectives, to the extent that its socio-political status symbols involve breeding war, consumption war and violent warrior mythology: (a) breeding war procreation above carrying capacity: i.e. cultures that reward their male members with concepts of manhood virility status, which are based on the man breeding a family above carrying capacity levels; (b) consumption war consuming above carrying capacity; i.e. cultures that reward their male members with concepts of manhood intelligence/virility status, which are based upon the man consuming above carrying capacity levels, to demonstrate his ‘large consumption penis’; (c) warrior mythology, where violent men are rewarded with ‘freedom fighter’ or ‘soldier’ socio-political status symbol medals and awards; particularly if the warrior mythology censors and ignores information to educate the culture’s members, that scarcity induced resource war violence can be avoided by the culture’s members choosing to breed and consume below carrying capacity levels. A culture which teaches a purely defensive warrior mythology; i.e. based purely on defense of its landbase and resources, i.e. which educate the members of the culture to avoid overpopulation and overconsumption scarcity inducing lifestyle’s within its culture, would not be considered a patriarchal culture.

[13] **Fully Informed Consenting Anarcho-Primitivist Culture:**

[14] Any woman who wishes to join the Gender Balanced Radical Honoursty Primitivist culture, must make a fully informed consenting decision, detailing her agreement to the principles of living in a non-violent Anarcho-Primitivist culture:

[14.1] A non-violent Anarcho-primitivist culture which has (a) no murder, no rape, no suicide, no homeless, no unemployment, no courts, no police, no prisons, no mental illness, no mental institutions (such as the Mosou in SW China); (b) has no

patriarchal objectification and sexualized concepts of 'beauty'; (c) where a woman's value is not based upon her 'beauty', but her character, and (c) she does not have to trade her sexuality for physical or economic safety and security, but can choose to love any man, for his character and personality; (d) as long as she takes personal responsibility for sustaining the non-violent bountiful free society by refraining from contributing to scarcity induced violence resulting from procreating and consuming above carrying capacity.

[14.2] She agrees to give up the values of violent 'civilized' society which has (a) murder, rape, suicide, homeless, unemployment, courts, police, prisons, mental illness, mental institutions, (b) has patriarchal objectification and sexualized concepts of 'beauty', which demean and vilify all women who do not meet those 'beauty' requirements; (c) where her value is not based on her honesty, character and integrity, but upon how well she is able to market and trade her sexuality for physical and economic safety and security, (c) where she is coerced by the society's endemic scarcity induced violence to purchase safety and security by trading sexual favours to men, for physical and economic safety and security; and cannot truly make a choice to love any man, based purely on his personality, and (d) where she is expected to be her partners brood sow, and sexual socio-economic status symbol bimbo accessory, to breed/consume above carrying capacity, to thereby aggravate scarcity induced violence, particularly against other lower class women, which maintains the socio-political enslaved violent society which forces women to give up a moral spiritual identity, and to exchange sexual favours for safety and security.

---

**Military Necessity of MILINT Earth Day Coup d'état; If Eco-Illiterate Voters fail to act for Sustainable Security future, by 22 April 2014**

[15] I am the TYGAE Author of *Military Necessity of MILINT Earth Day Coup d'état; If Eco-Illiterate Voters fail to act for Sustainable Security future, by 22 April 2014*.

[16] Overview of Military Necessity Justification for Implementing Temporary Sustainable Security Coup d'état De-Industrialization:

[16.1] Climate Change is a Global Security Threat - National Security Experts

[16.2] Climate Change is a Near-Term Extinction (NTE) Threat in absence of urgent immediate actions to massively reduce carbon emissions – Scientists

[16.3] Currently available Political Options for Military Officials Concerned about National Security Imperative to Reduce Global Security Threat and possible Near Term Extinction (NTE) threat of Climate Change:

- A. Military Appeal to American/World Citizens to 'Walk their Talk' of 'Supporting the Troops', by massively reducing their energy consumption, by "planting victory gardens, cutting down on fuel use, saving scrap metal

and old rubber, sacrifices, or maybe just examples of common sense and prudent lifestyle changes.”

[16.4] Policies Required for National Security Imperative to Reduce Carbon Emissions aggravation of Scarcity – Conflict Climate Change National Security Threat and Near-Term Extinction; currently only available by invoking Military Necessity Coup d’état’s:

[16.5] End Breeding War: Political Demographic policies required to give citizens incentives to reduce procreation to below carrying capacity to reduce their Scarcity – Conflict aggravation of Climate Change National Security Threat and Near-Term Extinction:

- A. Scientist: Every Child Increases a Woman’s Carbon Footprint by a factor of 20: A woman can reduce her carbon footprint 19 times more by having one fewer child than by all other energy efficiency actions the E.P.A. suggests combined.

[16.6] End Consumption War: Economic policies required to implement Relocalization, De-Industrialization and Primitivization:

- A. Scientist: Only Civilization Collapse will prevent runaway global climate change: Industrial Civilization / Consumption Developmentism as Heat Engine Root cause of Scarcity-Conflict Climate Change-National Security Impending Near-term Extinction reality.

[16.7] Ending Multinational Capitalism’s Pro-Growth Breeding and Consumption War National Security Policies are currently impossible to implement, except by invoking Military Necessity Coup d’état ’s because:

[16.8] Corporate Media’s Pro-Growth Agenda: Silence/Censorship/Non-coverage of Scientific study results advocating Sustainable Security (Walking the National Security – Scarcity & Conflict -- Talk to Support the Troops): ‘Procreate/Consume below carrying capacity’

[16.9] Corporate Media’s Pro-Growth Agenda is the cause of Citizens Eco-Illiterate ignorance of how to contribute to Sustainable Security: Procreate and Consume below carrying capacity, to avoid scarcity induced resource war conflict; and elect Eco-Literate politicians to enact sustainable laws.

[16.10] Tragedy of the Dunning-Kruger Democracy Commons: Eco-Illiterate Taker Cheater (conditional co-operators and free rider) citizens elect Eco-Illiterate Taker Cheater (conditional co-operators and free rider) Politicians.

[16.11] Nash Equilibrium Game Theory: International Cooperation requires politicians who are issue specific unconditional co-operators - Leavers. Milgram: Obedience Study: 92% of citizens who are conditional co-operators and free riders (65%); which only leaves 8% who are capable of issue specific unconditional co-operation. Consequently, universal franchise One Man, One Vote means that conditional co-operators and free rider Taker citizens elect conditional co-operators and free rider Taker politicians. Electing Eco-Literate Unconditional Co-operators

politicians requires only licensing Ecoliterate 'unconditional co-operators' with a license to vote.

[17] **Military Necessity Evaluation of Worst Case Scenario's: Implementing Coup d'état De-Industrialization vs. Green Economy:**

[17.1] **Implement Coup d'état De-Industrialization and Sustainable Security Constitutions:** we mitigate ecological collapse, and our children have a survivable sustainable security opportunity to manage the path towards a de-industrialized low/no tech, agrarian future.

[17.2] **Do nothing and allow Politicians to Implement Green Economy Industrial Revolution:** we keep industrial civilization heat engine lights on for a bit longer, which fails to reduce carbon emissions; activating runaway global climate change and near term extinction. We send our children into a climate furnace involving ecological collapse and extinction for humanity and millions of species.

[18] **MILINT Earth Day Correspondence and News: Notice's & Correspondence related to Military Necessity Justification for Implementing Temporary Sustainable Security Coup d'état De-Industrialization:**

[19] Copies of all documents and various acknowledged receipts available at MILINT Earth Day<sup>21</sup> (and navyjag-humint.co.nr).

[19.1] 03 May: MILINT Earth Day Petition to White House (wh.gov/zjyC):

**Avoid a Coup d'état, by implementing Sustainable Security Relocalization, De-Industrialization and Primitivization.**

We demand Sustainable Security Relocalization, Decentralization, De-Industrialization and Primitivization policies, by 22 April 2014 - 09:11 GMT; & turning off all coal, nuclear & fossil fuel sources to the National Grid on 22 April 2015.

If we are too few or ignored; we call on the US Military to participate in worldwide simultaneous temporary Coup d'état's; to enact Sustainable Security Constitutions (a 'SusSec Licence to Vote' policy).

If we fail, we confront the extermination of humanity, by 2100, due to runaway feedback confluence of ecological tipping points.

Our failure to act by 2014/15; will aggravate the runaway feedback confluence, rendering it impossible & futile to act later.

"We've got to act now." - Gen. Wesley Clark, NATO '96-99

*Mutant Message Down Under* is about an American woman who goes on a 4 month walkabout through the Outback, with nomadic Aboriginals, who call themselves the "Real People". She learns a new ecologically centred way of life, their methods of healing, decision to commit tribal suicide, and the wisdom of their 50,000-year-old culture; experiencing a dramatic personal transformation.

[19.15] **21 May: News: China agrees to impose carbon targets by 2016:**

The battle against global warming has received a transformational boost after China, proposed to set a cap on its greenhouse gas emissions for the first time, putting a ceiling on emissions from 2016.

It marks a dramatic change in China's approach to climate change .. The proposal to introduce the cap has been made by China's National Development and Reform Commission (NDRC), agency responsible for planning the country's social and economic development.

[19.16] **22 May: Corr: Dear Crackers: Chinks not Afraid of Dark: Let's De-Industrialize to Prevent Climate Change and Ecological Collapse:**

Military Necessity Evaluation of Worst Case Scenario's: (I) Coup d'état De-Industrialization and Sustainable Security Constitutions: mitigate ecological collapse, and our children have a survivable sustainable security opportunity to manage the path towards a de-industrialized low/no tech, agrarian future OR (II) Green Economy: activate runaway global climate change and near term extinction.

**Conclusion:** The longer the propagandists, legislators and profiteers of the Pro-Growth Agenda, avoid being held accountable for how their Pro-Growth agenda of Unsustainable Scarcity-Conflict Procreation, Consumption and Production, GDP/economic growth and industrialized energy consumption is massively aggravating the Climate Change Scarcity-Conflict Death Spiral on Steroids National Security Threat; the greater the military necessity urgency and justifications for implementing Temporary De-Industrialization and Sustainable Security Constitution Coup d'etat's.

Pursuant to 28 U.S.C § 1746, I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge.

Executed this 23<sup>rd</sup> day of May, 2013. George, South Africa
