Hi Stephen

CC: Jenny Everett

SQWorms Response to Aloha Gambia Natural Farming Thank You; CC: Knock Knock Uganda PC: Jenny Everett

Thanks for your email. No, I don't recall you having emailed me before; I always respond to emails; so would have responded. I did recently email some Peace Corps Volunteers from Uganda; more about that further below.

I am glad that the information on sqworms.co.nr was useful to you; most of it, particularly when it comes to the recipes was not my own work, I collected it from around the web and compiled it into one place.

Yes I am also in Africa. I was born here and experienced living under Verwoerd's Apartheid compared to the current Mandelaplatia; which I think gives me a slightly different perspective; than the culture shock you experienced arriving in Africa.

Did you notice the 'Ecology of Peace' notice; I have on the [SQWorms Contact](#) page; under 'please note'?

I did a google search on your email address and found your [Aloha Gambia](#) blog; and have been reading some of your blog posts; about your experiences dealing with indecisive Africans.

By indecisive Africans; I mean African people who are cognitively existentially clueless about what they want.

Put simply: if they were capable of buck stops here honesty; they would describe their existential purpose as no different from cognitively unconscious cockroaches who do not pretend

to be ‘conscious human beings capable of logic and reason’: *survive to fornicate* appears to be the African existential purpose; and ‘*survive to fuck/shop rape the planet*’ appears to be the foundational principle of Western European culture’s cockroach on bling imbeciles.

Uganda Peace Corps volunteer: Jenny Everett, quite accurately described an indecisive bleeding heart white guilt liberal pretending to give a fuck about ‘sincerely helping Africans’ dealing with indecisive Africans; at her blog: ***Knock Knock: Who’s There? Uganda***; in [Mortal Peace Corps Kombat](#).

I had some thoughts about some of the issues you discuss in your blog posts – my interpretation: about an indecisive European awakening to the reality of his indecisiveness about who he is or what he wants; except in terms of what his indecisive money and tits and ass slut worshipping culture has taught him to want; attempting to help indecisive Africans were more than thought provoking – and thought about providing you with some honest subjective feedback; from a woman who does know what she wants; who avoids attempting to help anyone else: European or African; unless they are willing to clarify what it is they want; and she considers what they want; worthy of her time and effort.

Do you want my feedback; and if so: Would you prefer I respond on your blog; or by email?

Generally – in terms of my Clerk [Ecology of Peace campaign](#) transparency standards – correspondence that is or could be interpreted as ‘EoP’ –v– ‘WiP’ negotiations -- whether it be truthseeking honest cooperative win-win discussion; or argumentative combative in your face Marine Corps Wake the Fuck Up obscenities to slap imbecile idiots across the head with a nail-ended two-by-four; to confront them with their -- ‘Do I want an ‘EoP’ or ‘WiP’ social contract future?’ – decision-making; are transparently recorded.

For numerous multi-tasking reasons; among others ***Knock Knock Uganda*** PCV Jenny Everett has already previously been contacted; as part of EoP Axis: Uganda; I shall update this PCV correspondence there at: ***EoP Axis Military Necessity Evacuation: Uganda*** [\[PDF\]](#)

Greetings,

I'm not sure if I've emailed you before but, if not, I wanted to say a big "thank you!" for putting up the website, good work! It's helped me a lot in my attempt to learn natural farming and it's good to see that you're also in Africa - I'm currently in The Gambia finishing up a 2 year Peace Corps Volunteer stint. I've been teaching natural farming here and made a manual to help the people. So, I'm just putting together a presentation for some new volunteers we have here and wanted to reach out to you. I've been looking at the site for a couple years now. Thanks and all the best

Stephen

Lara,

Thanks for the link to the other blog. It's good timing on your part, in that I just watched a talk by ernesto sirolli that seemed to bring up some similar points. here's the link in case you get a minute and want to see it:

https://www.ted.com/talks/ernesto_sirolli_want_to_help_someone_shut_up_and_listen?language=en

These thoughts are interesting to me. It seems too cynical to me but I think it could just be out of my comfort zone given my lack of time here. maybe you've seen through a lot more given your time.

Put simply: if they were capable of buck stops here honesty; they would describe their existential purpose as no different from cognitively unconscious cockroaches who do not pretend to be 'conscious human beings capable of logic and reason':*survive to fornicate* appears to be the African existential purpose; and '*survive to fuck/shop rape the planet*' appears to be the foundational principle of Western European culture's cockroach on bling imbeciles.

I had some thoughts about some of the issues you discuss in your blog posts – my interpretation: about an indecisive European awakening to the reality of his indecisiveness about who he is or what he wants; except in terms of what his indecisive money and tits and ass slut worshipping culture has taught him to want; attempting to help indecisive Africans were more than thought provoking – and thought about providing you with some honest subjective feedback; from a woman who does know what she wants; who avoids attempting to help anyone else: European or African; unless they are willing to clarify what it is they want; and she considers what they want; worthy of her time and effort.

I would be willing to take some feedback, email works best for me. Yes,i think it may help to let me know what you're thinking. But i have to be honest that with the way you're talking and your history of being born in Africa and 'at the party' for your whole life I'm worried I'm 'late to the party' so to speak. So if you can understand that i am new here and learning a lot about how to best help, given my background with its limitations as you pointed out, then i'd be open to chat with you.

Hi Stephen

Thought I had either offended you; or you must be one of those peace corps hillbilly's out in the bush; who only has access to their internet account once in a blue moon.

Glad to know that you were not offended.

Will take a look at the Ernesto Sirolli link and let you know my thoughts; and take a look at your blog again; to spark my memory on the issues that I thought I'd provide you with my weird perspective on.

You might find a friend of mine: Gene's [ideas about living in Africa](#) interesting. He is American Jew; former philosophy professor who has spent years in Africa; and he has some really unique perspectives on Europeans and their relationships with Africans; and the difference between relating to rural Africans and urbanized Euro-liberalized Africans. His ideas you can find [here](#).

So I shall check out your link; and get back to you with my working hypothesis perspectives on some of the issues you discuss in your blog posts.

Ernesto Sirolli: Want to help someone? Shut up and listen

Listened to the [Ernesto Sirolli: Want to help someone? Shut up and listen](#)² Ted presentation.

Short version: European Fuck the Future Rape the Planet corporate cocksucking whore bullshit lets pretend to help the niggers; while doing sweet fuck all about the root Masonic War is Peace international law social contract causes of the Niggers social conflict and European Political Correct 'Look at me: I'm a good cracker that loves niggers' Mindfuck PsyWarfare conflict misery.

Aloha Gambia Natural Farming & Knock Knock Uganda PC Mortal Kombat

It relates to some other stuff I was working on today – hence the large CC list -- a draft still uncompleted. Here are excerpts:

My working hypothesis definition for the concept 'problem'; and how I decide to help someone with what they say is a 'problem':

A 'problem' is a sincere perception or interpretation of reality with regard to a thing; that (b) causes you emotional, psychological, physical, sexual or spiritual discomfort; which you sincerely would prefer to avoid; (c) you are willing to investigate and confront the root cause of the 'problem'; (d) once the root cause of the problem is identified; you have the courage and honour to prove your sincerity by taking responsibility for (i) any of your own behaviour or lifestyle decisions which contributed to the root cause of the problem; (ii) cooperating with anyone else who sincerely considers the identified 'problem' to be a problem; to determine whether, and if so: how; it is possible for you to convert; and if not: eliminate; the individuals and/or organizations who pretend they are solving the 'problem; while obstructing identifying the root causes of the problem for elimination; because essentially their organization is not about solving the problem; but perpetuating the problem for their socio-economic or psycho-ego status profit or benefit.

Put simply:

If you complain about some 'thing' as being a 'problem' but you are not sincere about doing what needs to be done to (a) investigate the root causes; (b) confront the root causes in your own lifestyle or behaviour practices; (c) then the issue you are whining about is not a 'problem'; because you personally refuse to do what needs to be done in your own life to stop contributing to the root causes of the problem you whine about.

If a blue sky causes you discomfort; and is consequently a 'problem'; you investigate whether there is anything you can do about changing the colour of the sky to pink or green or whatever you would prefer it to be. If you can change its colour; you have fixed your problem. If you cannot; but others may be able to; you can cooperate with them to see if collectively you can

² https://www.ted.com/talks/ernesto_sirolli_want_to_help_someone_shut_up_and_listen?language=en

change the sky's colour. If you sincerely cooperate to the best of your abilities; and collectively it is impossible for you to change the colour of the blue sky; then its best to confront 'The sky is blue; it was a 'problem' while I thought there was something I could do about changing its colour; now I know that there is nothing I can do; to change the blue colour of the sky; so if or when I am unable to 'fix' what I have termed to be a 'problem'; it is time to stop referring to an unchangeable reality as a 'problem' and simply as a state of sky-reality that I don't like; that cannot be altered, and hence shall remain uncomfortable reality; until it can be altered, if ever; or if not; until I am willing to depart this planet and investigate whether there are other planets with different colour sky's.

Conclusion:

A problem is an unpleasant thing you can fix; once you have fixed it, it is gone.
Reality is an unpleasant thing you can't fix; you can only confront it and deal with it as it is.

Some people get confused. They make their lives miserable complaining about problems; they are too lazy to fix and remove..

Others pretend to be concerned about those who are miserable who are complaining about some or other problem; and propose themselves as 'Mr. Fix It' problem solvers, when in fact they have no intentions of solving the root causes of the problems; because they profit handsomely from not solving the problems; only pretending to be problem solvers.

A real Mr Fix It problem solver is someone who (a) clearly identifies the root cause of the problem; (b) is willing to amend their own lifestyle or behaviour if it is contributing to the root cause of the problem; (c) cooperate with others who are sincere about doing whatever needs to be done to fix the problem; (d) if it turns out that the problem either cannot be fixed; or there are not enough persons willing to cooperate to provide the tools necessary for fixing the problem; admit that 'the problem' is no longer 'a problem'; because it is 'unfixable'. Until it can be fixed; or there are enough persons willing to cooperate to provide the tools necessary for fixing the problem; it is no longer a 'problem' it is reality.

My reality:

I got a roof over my head, food to eat, clean water to drink.
I live with two people whom I care about a great deal; who care about me; who are sincere and willing to work through our disagreements; slowly sometimes, but we manage.
I spend my time on non-raining days growing my veggies, making compost, pottering around fixing gardening stuff; walking the dogs.
I spend evening time or rainy days doing research online and providing whatever information; Timothy may consider useful; or thinks someone else may consider useful online.

My Problems:

Personal Relationship:

I am not physically with the man I love. However he knows that the day or minute he is ready and willing to be with me; that I shall be there for him.

Until then; I help him if or where I can; to resolve the obstacles standing in his way; that obstruct him from being able to inform me; of whether he wants to physically be with me (I imagine the answer to that is 'yes; 14 years ago'; but he does not want to give me false hope; when there are so many obstacles to overcome for that to occur).

If we can overcome the obstacles in his way; then we shall do so; and be able to be together; then we shall have solved our problem.

If we cannot overcome the obstacles in his way; then we sure have bent over backwards trying; and we shall just have to confront the reality that our problem is unsolvable; and hence calling it a problem is inaccurate; and the correct term would be 'reality'.

We shall then confront that reality and deal with it and make the best of it.

Planetary Ecological Collapse:

If humans don't cooperate to orderly and humanely implement depopulation and deindustrialization; Planet Earth is going to kick their butts very violently and do it herself [Lawrence Wilkerson: [Reality Asserts Itself: Nature Predator Bats Last](#)³].

Whether an [Ecology of Peace international law social contract](#)⁴ can be implemented is a problem that can be solved or not; has not finally been resolved yet; so don't know.

If not: I ain't bred any children; so I don't have to worry about the horrific future they would have to endure in a Masonic War is Peace Armageddon.

If shit gets too bad; me and my parents are quite happy to have a last meal together; and then depart together.

Ecology of Peace Options for Mitigating and Resolving Planetary Ecological Collapse:

As you may or may not be aware I have been working on [Ecology of Peace options](#)⁵ with some others to investigate and if possible implement options for mitigating and resolving planetary ecological collapse by humanely and orderly implementing Depopulation and Deindustrialization.

Here are some working hypothesis conclusions:

Excerpt: 23 April 2013 Correspondence to Guy McPherson:

Imagine there are 40 odd Generals/Admirals extremely concerned about the ecological collapse reality we face.

³ <https://www.youtube.com/watch?v=P6TUcOsAwd0&index=3&list=PL6P40xKG0oi2kJC-VzWEXwpFDJpJ7vEdm>

⁴ <http://tygae.weebly.com/ecology-of-peace.html>

⁵ <http://tygae.weebly.com/eop-nwo-social-contract-options.html>

Imagine they are willing to consider the possibility about implementing an ‘ecological necessity’ coup, for the purpose of implementing de-industrialization. They are not certain that it could be mitigated. Would it make a difference? Can ecological collapse be mitigated, or is that delusional?

If you think it can be mitigated. I need the following information:

1. I need the hard ‘ecological necessity’ facts justifying the coup.
2. I also need the hard – To do De-Industrialization list – facts (such as decommission the world’s hundreds of nuclear power plants, etc.).

Response from Guy McPherson:

He refused to help. Hysterically called his lawyer; who advised him to shut the fuck up.

My EoP Working Hypothesis Conclusion Response to Said Generals Working Hypothesis Problem Solving::

If they are 40 sincere Generals/Admirals whose priority is problem solving cooperation; with a few hundred or thousand similarly sincere soldiers, they could implement deindustrialization and humane and orderly depopulation of over 6 billion of the planets parasites within less than 2-5 years; if they really wanted to.

If they are parasite ego-mindfuck ‘lets create a bullshit the public relations perception management illusion that we are sincere problem solving Generals/Admirals/Scientists; while we really couldn’t care less about problem solving; cause the only thing we care about is our fragile ego’s; they shall do nothing to implement deindustrialization and humane and orderly depopulation until the planet ecological carrying capacity limits implements deindustrialization and depopulation very violently.

The hard ‘[ecological necessity](http://tygae.weebly.com/ecological-overshoot.html)⁶’ [tipping point](http://tygae.weebly.com/tipping-points.html)⁷ facts justifying such a [coup d’etat have already been compiled](http://tygae.weebly.com/military-necessity-doctrine.html)⁸, not only compiled, but submitted into various legal proceedings; such as for example: [European Court for Human Rights: Johnstone v Norway](http://ecofeminist-v-breivik.weebly.com/eu-court-human-rights.html)⁹.

To-do De-Industrialization list: Decommission of Nuclear Power plants:

The to-do list would depend on the whether your Generals/Admirals and their soldiers are (a) sincerely cooperating problem solving types; or (b) parasite leeching fragile ego Mindfuck types.

If you have any Generals/Admirals who are sincere cooperating problem solving types; how many are there; and how many similarly motivated sincere soldiers they have access to?

If they are 40 sincere Generals/Admirals whose priority is problem solving cooperation; with a few hundred or thousand similarly sincere soldiers, they could implement deindustrialization

⁶ <http://tygae.weebly.com/ecological-overshoot.html>

⁷ <http://tygae.weebly.com/tipping-points.html>

⁸ <http://tygae.weebly.com/military-necessity-doctrine.html>

⁹ <http://ecofeminist-v-breivik.weebly.com/eu-court-human-rights.html>

and humane and orderly depopulation of over 6 billion of the planets parasites within less than 2-5 years; if they really wanted to.

There are various options; it would depend on (a) what mass-killing technology the Generals/Admirals have direct 'finger on the button' access to; or what killing technology their soldiers are willing to [strategically occupy for strategic killing or negotiating purposes](#)¹⁰; (b) their ability to quickly target and eliminate those whom they have agreed upon to be the combatants; with legal authority – police, prosecutors, judges – support.

For example:

Chernobyl Decommission of Nuclear Power plants option.

In both the medium short term and long term; the [Chernobyl – technical mistake – decommission option](#)¹¹ [David Cameron: [EU negotiations: all options on the Table](#)¹² – [resources to help Chilcot Inquiry into Iraq War](#)¹³ | Christian Defense League: [Scottish Nuclear Power Plant Worker caught studying bomb-making websites at work](#)¹⁴; [Doosan Babcock contractor at Nuclear power plant 'visited bomb-making website'](#)¹⁵ | Washington Times: [Obama calls slain TX Deputy Sheriff wife Kathleen Goforth; from plane on way to Alaska](#)¹⁶] would be of far greater benefit to the environment and other animal species; than the devastation on the environment from human industrial agricultural habitation pontificating about nuclear power decommission, depopulation and deindustrialization [FT: [Radiation Biology: New Life at Chernobyl](#)¹⁷].

If necessary; prior to such nuclear decommission event in particular country; the 'nuclear decommission team' can include as one of their Chernobyl decommission hostage demands that all mainstream media publications should be raided; and required to play/print a pre-recorded message; whereby all citizens are informed that these media publications have been deliberately and maliciously censoring information from the public about efforts to implement an Ecology of Peace international law social contract; for the benefit of all the worlds citizens; so now they are being forced to do so at gunpoint.

The editors and journalists who refuse are fired and replaced with journalists willing to cooperate and educate the citizens about the necessity of signing their EoP Axis Oaths. If there are enough scientists and engineers motivated to sincerely cooperate to decommission the nuclear power plant within 2 years; they can consider the option of doing so; or evacuate those who have signed EoP Axis oaths to other nations where there are no nuclear power plants; where all scarcity combatants who refused to sign EoP Axis Oaths have been psychotronically evacuated [[EoP Axis evacuation info](#)¹⁸]; leaving only a miniscule population; where there is space for individuals evacuated from Chernobyl decommission zone nations; who are sincere about living in accordance to EoP social contract terms; who can re-establish themselves in family or EoP like kibbutz communities; based upon New Economy principles.

World Nuclear Power Reactors

There are many options; which depend on among other issues (a) the level of sincere problem solving of decision-makers –vs– ego Mindfuck bullshit image management; (b) military decision-makers access to killing technology and legal support for the implementation of such killing technology; (c) whether their depopulation goals and ‘combatant’ legal definitions are based upon merit irrespective of race, class or religion [[Humans: An Endangered Species, by Magistrate Jason Brent](#)²⁶]; or Masonic elite human factory farming parasitism; (d) whether their goals are justice or parasitic profiteering; they will use different levels of white – gray – black information quality operations; to recruit fellow sincere problem solving peers or human factory farming sperm donor / brood sow cannon fodder; etc.

Legal support for the implementation of such killing technology:

The greater the honourable sincere legal support for the implementation of such killing technology; the more orderly, humane and transparent shall be the process of deindustrialization and depopulation.

²⁶ <http://sqswans.weebly.com/jason-brent.html>

Since they have the capacity for psychotronic control of Police, Prosecutors and Judges minds; I don't imagine this would be a significant problem; once they had finalized their decision-making that winning Police, Prosecutors and Judges hearts and minds is no longer an option; time has run out; and so decide to use other forms of police / prosecutor / judges control methods; but I ain't got all the facts. Naturally the former hearts and minds option is by far preferable.

Excerpts: Humans: An Endangered Species; by Jason Brent:

The action I am initially proposing is value neutral and does not favor or harm any individual or group. The action I am proposing will be applied to every person or group without favoring anyone. The action is very simple---limit the right of any male to father only one live child and limit the right of every woman to one live birth. In simple terms a couple is limited to one and only one child—not one child for the male and one child for the female.

These limitations would be applied to every single human being without regard to race, religion, national origin or anything else and it would be absolute, no exceptions. It would be applied without regard for wealth, or the lack of wealth, and it would be applied without regard for the country of birth or residence of either the male or female. It would be applied without regard to intelligence, or the lack thereof, and without regard of the ability of the male or female to function in society. (At a later date when a method was agreed upon relating to dividing human beings into two groups, the ability to function in society would be considered in relation to who could or could not reproduce.) The right to either father a child or for a female to give birth could not be sold or transferred; it would be personal to the individual. If a live child were born with a birth defect or with some other disability it would not permit either the father or mother to produce another child. Each couple would have the right to have all appropriate pre-natal tests to determine if the child in the womb would be born with a birth or genetic defect and if the chance existed that the child would be born with such a defect to have an abortion.

Since survival of our species depends on the one child rule, under my proposal any attempt to evade the rule would result in death of the evader and of any second child. The rule to be fair must be absolute, without a single exception. If the female cannot or refuses to provide the name of the father she and the child shall be immediately executed. All of the ideas set forth in this paragraph may be considered horrible and inhumane. However, since they will be applied equally, no individual or group is harmed except to the extent that an individual cannot either father or give birth to a second child. The harm caused to the individual and the harm caused to all of humanity by enforcing the one child rule set forth above is miniscule compared to the harm which all of humanity would suffer if population were not reduced.

Since the birth of a child is very hard to hide, there must be communal responsibility and accountability for any attempt to do so. Those who knowingly failed to report the birth of a second or any higher number of children would themselves be subject to the very same severe punishment that would be meted out to the parents of the second or higher numbered child—no religious, cultural or ethnic exemptions would obtain. Humanity cannot consider the evasion of the single child rule a game to be played with a minor penalty, if caught. No group or individual could be permitted any evasion of the one child rule a that would lead to a disparity among groups and among individuals causing irreparable harm to the entire system established to reduce population. Should this sanction seem barbaric or draconian, it is surely less draconian

in its effects than the merciless verdict of nature upon a species that refuses to contain its expansion.

In order for this proposal to be fair, equitable and workable, society and governments would be required to take action today to provide the means for every human being to control his or her fertility, to give everyone on the face of the earth the ability to limit birth to a single child. Governments would be required to devote a whatever portion of their Gross Domestic Product is necessary to the provision of artificial birth control devices of any and all types including sterilization, at low or no cost as appropriate, to their citizens, no matter the age of the citizens once a citizen reaches the age he/she can physically reproduce. This would also include instruction as how to use the devices. This would also include education of both males and females that the birth of a second child would result in the execution of the father and mother as well as the child. Governments would be required to provide safe, as much as any medical procedure can be safe, and low cost or free access to abortion. If any person, either male or female, had more than two failures of birth control devices, it would be conclusively presumed that the person was unable to use birth control devices and the person would be physically and permanently sterilized.

If poor nations were unable to devote the necessary funds to accomplish the one child rule in five years, the rich nations of the world would be required to assist the poor nations, after an evaluation that the poor nations were doing the best they could under some reasonable standard. Since survival of our species depends on reducing population below the current 6.7 billion humans now alive, the necessary funds to establish the system to control population must be made available. It should be emphasized that a "One-Child-Per-Family" (OCPF) law that is almost completely effective will not suffice. It must be totally and universally effective. After a five year preparation period, the rule must be enforced. The reduction in population would continue under the one child rule until all of humanity agreed upon the method and criteria necessary to implement the two group solution described herein. Population would continue to be reduced pursuant to the method and criteria of the two group solution until it reached 300 million or some other lower number agreed upon by humanity. The number finally agreed upon would be based on the ability of the earth to provide resources for humanity to maintain an acceptable standard of living for a minimum of 25,000 years. And 25,000 years is infinitely small when compared to the 160 million years the dinosaurs ruled the earth.

No doubt any proposal that would recommend capital punishment for transgressors of the One-Child-Per-Family law presently evokes immediate revulsion and rejection. Outside the context of an imminent die-off, given our heritage of moral, religious and cultural programming, I would be surprised if it didn't. An example which shows that morality changes when circumstances change follows. Any Londoner who proposed in August 1938 that the Royal Air Force should one day bomb German cities with women and children in them would be summarily dismissed as a callous barbarian. But just two years later Londoners were clamoring for that action. Reality has a way of effecting abrupt ethical changes. What is not presently comprehended by almost all of humanity is that we are now in an emergency. Our species is on the brink of an unparalleled catastrophe—our destruction and the destruction of our civilization. It is a matter of complete indifference to me that many, if not all, readers will find the execution of anyone having a second child to be horrible and against every moral precept they learned or understood was applicable to humanity. The problem is not that my prescriptions are immoral or horrible. Rather the problem is that the situation humanity finds itself in is horrible. I will now remind the readers that under the law I propose every individual would be well aware of the consequences of flouting the law. Which of the two evils is worse--- a) executing anyone who

knowingly violates the one child rule; or b) not reducing population such that the vast majority or probably all of humanity is destroyed? Under this system fertility drugs would not be permitted or if they were permitted and used, only one child would be permitted to be born alive or the rest would be destroyed at birth, if more than one were born alive. If a women gave birth to more than one child and fertility drugs or any other actions to increase fertility or the number of children born were not the cause, those children would be permitted to live. Each individual will have a very clear choice—execution or birth control or sterilization or abortion or abstinence.

[Jason Brent: Humans: An Endangered Species: [Excerpts](#)²⁷ | [Full](#)²⁸]

Francis Al Sisi: Is it conceivable that 1.6 billion [Muslims / masons / Christians / Catholics / Europeans / Africans] could kill the worlds remaining population of 7 billion, so that they could live (on their own)?

We spoke earlier about the importance of the religious discourse, and I would like to reiterate that we are not doing enough with regard to true religious discourse. The problem has never been with our faith. Perhaps the problem lies in ideology, and this ideology is sanctified among us. I am talking about religious discourse that is in keeping with its times.

I am addressing the religious scholars and clerics. We must take a long, hard look at the current situation. I have talked about this several times in the past. We must take a long, hard look at the situation we are in.

It is inconceivable that the ideology we sanctify should make our entire nation a source of concern, danger, killing, and destruction all over the world. It is inconceivable that this ideology. I am referring not to "religion," but to "ideology" - the body of ideas and texts that we have sanctified in the course of centuries, to the point that challenging them has become very difficult.

It has reached the point that (this ideology) is hostile to the entire world. It is conceivable that 1.6 billion (muslims) would kill the worlds population of 7 billion, so that they could live (on their own)? This is inconceivable.

I say these things here, at Al-Azhar, before religious clerics and scholars. May Allah bear witness on Judgment Day to the truth of your intentions, regarding what I say to you today.

You cannot see things clearly when you are locked (in this ideology). You must emerge from it and look from outside, in order to get closer to a truly enlightened ideology. You must oppose it with resolve.

Let me say it again: We need to revolutionize our religion. [applause]

Honorable Imam (the Grand Sheik of Al-Azhar), you bear responsibility before Allah. The world in its entirety awaits your words, because the Islamic nation is being torn apart, destroyed, and is heading to perdition. We ourselves are bringing it to perdition.

[Egypt Independent: [Farmer serve's prison time for naming donkey after General Al-Sisi](#)²⁹ | Emri: [Egyptian President Abd Al-Fattah Al-Sisi at Al-Azhar: We Must Revolutionize Our Religion](#)³⁰]

EoP A: It is conceivable that 1.6 billion [Muslims / masons / Christians / Catholics / Europeans / Africans] could kill the worlds remaining population of 7 billion, so that they could live (on their own).

As far as I am aware it is quite possible for less than 1 million military officials with access to psychotronic technology to kill the remaining worlds population of 6 plus billion. See psychotronic technology referred to in EoP Axis.

NB Caveat: I could be wrong; and even if I am right; just because such military officials have access to the technology; does not necessarily mean they shall use it; or that if they choose to use it; that they shall follow my recommendations for whom to kill.

If the technology exists as described; and if those with the technology intend to use it; they are faced with the question: whom should live and whom should be evacuated from the planetary genepool?

It would depend on the primary existential values of those with access to the mass killing technology's: whom they would prefer to get rid of; whether such decision is based upon some form of objectively reasonable standard based upon merit and merit alone; excluding questions of race, class, culture or religion; or whether such decision is made by one group based on their particular religion: Masonic elite; Muslim; Christian; Capitalist, Communist, or racial factors; etc.

I personally don't have any problems with any group of individuals making the decision for an orderly and humane depopulation of the planet; to return to ecological carrying capacity limits.

As such I am quite in agreement with Stalin's: The death of one eco-innocent is a tragedy; the death of 6 billion scarcity combatants a statistic.

My thoughts on the issue are that if you are an honourable person; you give the person/s you consider to be behaving in a manner that justifies their death; the [In Your Face](#)³¹ legal notice -- [EoP ICC Complaint](#)³² -- opportunity to be informed that their behaviour is unlawful and considered worthy of extermination from the genepool; should they refuse to alter it. If they don't amend their ways; or provide a reasonable justification for their refusal; then you have made your honourable efforts to inform them in crystal clear terms they understand; what the consequences shall be if they refuse to alter their ways or provide justification for their behaviour. Essentially it is a fully informed consent assisted suicide; no different than that of [Armin Meiwes](#)³³ and [Bernd Brandes](#)³⁴ fully informed consenting cannibalism.

³⁴ <http://www.theguardian.com/world/2003/dec/04/germany.lukeharding>

If I can help the ultimate decision-makers to make the process more fair, honourable; orderly and humane; between racial, class or religious warring parties; I do what I can; while I think they are sincere.

Personally I think the decision should be based upon Ecology of Peace co-operator merit; anyone from any class, race, culture or religion who is willing to take responsibility for cooperating to implement an Ecology of Peace international law social contract; by signing an [EoP Axis oath](#)³⁵; but if others decide on a racial or class or some other factors that exclude me; I am okay with that.

All I ask is: I'd like to spend a few months / years physically with Timothy; somewhere off-grid remote with my honey; before we choose to depart together.

Lara,

it's true i'm a little bit out in the bush, but just in spirit, as there's an internet cafe in my town, which is rare for gambia. yeah, you didn't much offend me, maybe a little, but that's only because i know you are right and i'm a bit naive to the development game, culture here and my biases given my history. with me just at the start of my eye-opening experience it's something that's tough to admit when you feel your making leaps and bounds in perspective and insight: that' i'm just at the humble start. but i appreciate you checking in and being aware of how you may come across, it makes me feel that you're more approachable. i'll check out gene's link, this is all very interesting to me and makes me further believe that the simple act of helping, in any situation, is an elusive and undervalued skill.

Ok, i'm outta here in a week, i'm going overland from gambia to dakar tomorrow and will fly back to the states in a week. talk with you later on,

stephen

EoP libertarian ethics Thomas Sankara Response to Peace Corps: Aloha Gambia Natural Farming & Knock Knock Uganda

it's true i'm a little bit out in the bush, but just in spirit, as there's an internet cafe in my town, which is rare for gambia.

I imagine that's true. Internet café's will be rare for the entire planet in the not too distant future; once [industrialization collapses](#).

yeah, you didn't much offend me, maybe a little,

Sorry. Did not mean to offend. Just prefer honest communication; and some cultures interpret honesty as insulting and flattery as respect; whereas in my culture I consider honesty to be respect; and flattery to be insulting.

but that's only because i know you are right and i'm a bit naive to the development game, culture here and my biases given my history. with me just at the start of my eye-opening experience it's something that's tough to admit when you feel your making leaps and bounds in perspective and insight: that' i'm just at the humble start.

Hmmm. There is much that can be said on this issue. Not sure what you mean by the 'development game'?

Re: Development Game:

Re: *Games: Rules and No rules games:*

I don't play games – poker, bridge or monopoly or any sport – where those playing the games don't make the rules clear; and same rules apply to all players. What would be the point? The game either has rules or it has no rules. The game either has rules that all the players must adhere to; or it has no rules; then simply refer to it as 'No Rules game'.

My interpretation and EoP Oath response to President Vladimir Putin's Valdai question: New Rules or No Rules; can be found at: ***Former MILED Clerk Ecology of Peace (EoP) New Rules or current Masonic War is Peace (WiP) No-Los-Pepes Rules culture negotiations [PDF]***.

Los Pepes no rules are similar to Beirut no rules; or Keiser Souza no rules. An example of Los Pepes no rules can be found in: [Pablo Escobar: King of Coke](#). Keiser Souza no rules description can be found in the movie: [The Usual Suspects](#). Beirut no rules is referred to in the movie [Syriana](#); an example of KGB playing Beirut rules is referred to in correspondence to Tim Johnston [\[PDF\]](#).

RE: How Serious Pentagon, CIA & NSA Generals know anyone is sincere:

If or when you identify the serious American Generals; and/or Russian, NATO, Pakistani, Chinese, Australia etc Generals; – of whom you have such a high opinion – who appointed you as their spokesperson; who want you to act as their Masonic War is Peace 'fuck honour' debate spokesperson.

I suggest you discuss the issue with your family.

New Ecology of Peace rules including communication rules; are clearly outlined [here](#); which I practice in my relating to all; irrespective of race, class or religion.

Masonic War is Peace Rules is a different kettle of fish; depending on the particular racial, class or religious sub-culture and the Masonic Rule of Law state functions will to regulate or ignore the particular sub-cultures practicing of their respective inter sub-cultural rules.

The higher you go up the Masonic food chain where the big boy Generals, Bankers, Judges, CEO's tread, you enter into areas where state police and prosecutorial functions generally ignore the particular sub-cultures Masonic War is Peace rules; whose rules can be similar to Beirut rules: i.e. zones where the state 'rule of law' allegedly applicable to everyone else has collapsed; as can be noted in any collapsed state ruled by overt gangs and their warlords; where as Crowley would say where 'do what thou wilt' rules rule; or some sub-cultural version of that imposed by those capable of the greatest brute force or cruelty to maintain order and obedience to their sub-cultural version of Beirut, or Los Pepes, etc rules.

An example of [KGB / FSB playing Beirut rules](#).

My EoP rules for expressing my opinions – particularly what could be interpreted by them personally or some of their followers; as negative opinions – to any General; or for that matter politician, pope, guru, homeless person, etc; is to express my honest opinions to them; for their attention; to their inbox; or if possible to their face; and secondly: to sincerely give them the

opportunity of proving my working hypothesis opinion about them wrong. If so to publicly amend my working hypothesis conclusion and if necessary apologize.

Masonic War is Peace Political Party no rules example can be found in Mexico where it is overt; as opposed to in other duhmockery's where it is covert. In Mexico it is referred to as Plaza 123; a description thereof can be found in: [Lord of the Sky: Drug Lord: Amado Carillo Fuentes](#).

An example of Ecology of Peace Political Party rules can be found in *Correspondence to UNFCCC, Cop 21 and GMACCC: (i) Paris Choking with F**k Honour Cop21 Ego Supremacists pretending they give a f**k about climate change; (ii) EoP Cop21 Simple Root Cause Problem Solving Recommendation [PDF]*; with an excerpt copy in: *Judge James Gray: Ecology of Peace ICC Private Prosecution Assistance of Counsel Requested [PDF]*.

Negotiators from over 190 countries – representing citizens from many different races, classes, cultures, religions – have come together to negotiate a 'climate change agreement'; to stabilize atmospheric concentrations of greenhouse gases (GHGs) to avoid "dangerous anthropogenic interference with the climate system"; with the aim of keeping global warming below 2°C.

Simplify Suggestion:

"If you can't explain it simply, you don't understand it well enough." - Albert Einstein

1. Climate change – like food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources – is a direct and indirect consequence of overpopulation and overconsumption.
2. Overconsumption and overpopulation are a direct consequence of humans procreating and consuming above ecological carrying capacity limits.
3. Humans procreate and consume above ecological carrying capacity limits because the current international law social contract; provides the worlds nations citizens with the 'right to breed and consume with total disregard for ecological carrying capacity limits'.
4. Humans will stop procreating and consuming above ecological carrying capacity limits when legislators amend the international law social contract; to require all the worlds citizens to procreate and consume below ecological carrying capacity limits.

EoP Cop21 Simple Root Cause Problem Solving Recommendation:

Cop 21 negotiators agree to support international law legislation requiring all the worlds nations political parties to agree to implement national legislation by 11 September 2016; that requires all their citizens to procreate and consume below ecological carrying capacity limits. Any political party which refuses to cooperate; is to lose their political party license. Any nation that refuses to remove the violating political party's license may be legally charged in an international court; by any individual in that nation or another nation with the intention to bribe their citizens to overbreed or overconsume; which shall be considered crimes of aggression acts of war; punishable by the death penalty for every single member of that political party.

Once implemented all political parties will be on an even playing field and will no longer be able to bribe their citizens with individual or corporate welfare to vote for their political party.

Politicians shall have to find their [Thomas Sankara](#) backbones; to cooperate with their citizens to teach them how to become cooperating self-reliant sustainable nations.

Re: *Development*:

As for development; much of the western world appears to consider industrialization rape of the planet and being converted from citizens into dumbfuck consumers to be 'development' [See: [Capitalist Cultural Consumptionism](#); and *What is Cultural Imperialism?*, by Matti Sarmela; copy in *Control of Consumption: Global Corporate Cultural Imperialism Racket* at [Sustainable Security Defcon Theses](#)].

I don't share that perspective on development.

Having lived in and traveled through many cultures; and recognizing that all those cultures – whether they are religious or racial cultures all with different 'development' ideals – reside on one planet whose resources are finite; my perspective is that the Peace Corps and any other government entity attempting to enforce European industrial development down other traditional racial or religious cultures throats is not only fucked but highly unethical. [My EoP Libertarian concept of ethics is clarified in EoP v WiP negotiations correspondence to Unashamedly Ethical; copy at [MILED Clerk Notice](#)]

If the Peace Corp or any other European so-called development, including 'sustainable development' agency gave a fuck about sustainable inter-cultural ethical development; their 'development policy' would be:

Ecology of Peace Facts Reality: (a) Earth is not flat; (b) Earth renewable and non-renewable resources are finite; (c) When humans [breed or consume above ecological carrying capacity limits](#), it results in [resource conflict](#); (d) To sustainably protect and conserve natural resources in accordance to local and national carrying capacity limits; and restrict national and international inter-cultural, racial and religious resource war conflict; humans must reform and/or abolish the [Masonic War is Peace](#) international law social contract; and cooperate to implement an [Ecology of Peace](#) international law social contract that restricts all the worlds citizens, from all races, religions and classes; to breed and consume below ecological carrying capacity limits.

Put simply: everyone breed and consume below ecological carrying capacity limits and engage in fully informed consenting agreements.

[but i appreciate you checking in and being aware of how you may come across,](#)

Not sure what you mean 'how I may come across'. If Tom and Mary are from different cultures; how Tom comes across to Mary; if Tom is not coming across to Mary as Mary expect Tom should come across to Mary; is a function of Mary's socio-cultural beliefs about how Tom 'should' come across to Mary.

If I am not coming across to you in a way that you think I should come across; then you are welcome to clarify for me; how and why you think I should come across to you in the way you consider to be the 'correct way to come across' to a person from your culture.

[it makes me feel that you're more approachable.](#)

Well if I am coming across to you as approachable; that's good; if we are both interested in an honest conversation; then we may learn something from each other; and be able to cooperate to on issues we agree upon; or nonviolently to agree to disagree on issues we don't agree upon.

i'll check out gene's link, this is all very interesting to me and makes me further believe that the simple act of helping, in any situation, is an elusive and undervalued skill.

Agreed. I don't think you can help anyone until you are clear about what it is that they want. If they don't know what they want; you could probably help them to clarify for themselves that they are confused and don't know what they want; which would be a good start for them to start considering what it is they want from being alive on planet earth; as an alleged human.

It is however possible to help someone who does know what they want.

If you have the skills and/or resources to help them (a) if you want to; you can help them; (b) if you don't know if you want to help them, cause you need more information: you can tell them: I need more information to make a decision as to whether I want to help you or not; and tell them what information you need; so you can make your decision about whether you want to help them; (c) if you don't want to help them; tell them asap; so that you don't waste their time.

Ok, i'm outta here in a week, i'm going overland from gambia to dakar tomorrow and will fly back to the states in a week. talk with you later on,

Okay; hope you have a good trip to Dakar and back home. Till then.

Lara
